<p>A fee is required to be submitted with the completed application form.</p> <p>Other related applications may be submitted and processed concurrently.</p> <p>A separate justification report may be used to address any of the questions within the application form.</p>

STEPS IN THE PROCESS
<p>Step 1 Consult with Town of LaSalle Planning Staff: Applicants are required to meet with Town Planning Staff prior to submitting an application. This is a formal meeting to be scheduled between the Applicant and Town of LaSalle Staff before submitting an application.</p> <p>The pre-application consultation process is intended to identify issues early in the process and to identify the reports, studies, plans and information required to be submitted as part of a complete application. A complete application enables Council to make informed decisions within a reasonable period of time and ensures that Town Staff, the public and other stakeholders have access to the relevant information early in the process.</p> <p>While every effort has been made to identify information needs at this stage, additional issues and/or information needs may be identified through the application review process and may be requested at that time.</p>

STEPS IN THE PROCESS

Step 2 Complete and submit the application form: Following your pre-application consultation, you will be required to complete and submit the required application form, and provide;

- A Cheque, made payable to the “Town of LaSalle”, to cover the application fee;
- A sketch plan, including information as outlined on page 8, subsection 11;
- Your written authorization, identifying by name the individual who will act as your agent or solicitor for filing and handling your application(s), if applicable;
- Additional information (reports, studies, plans, etc.) that was identified at the pre-application consultation meeting. To expedite the review process, you are strongly encouraged to submit photographs or other relevant documentation that will assist in evaluating your application. To avoid delays, please ensure that your application is complete, that all drawings are neat and legible and that all dimensions are accurate.

Step 3 Complete application accepted and preliminary staff review is undertaken: A preliminary staff review is undertaken, and the application is assessed for completeness and either accepted or returned to the Applicant, requesting further information. If complete, a file is opened and timelines for processing are established.

Step 4 The Application is circulated to internal Departments and where required to ERCA, the County of Essex, and Essex Power: Now that the application is complete, Planning Staff circulate the application to internal Departments explaining the nature of the subject application, and inviting comment. Depending on the location of the subject lands, the application may also be circulated to ERCA, the County of Essex and Essex Power.

Step 5 Staff Report to Planning Advisory Committee: An initial Staff Report is prepared, explaining the nature of the subject application and providing relevant background information.

Step 6 Staff Report to Council: Based on an analysis of the application and the comments received, Town Planning Staff prepares a report to Council summarizing the comments received, describing how those comments are to be addressed, and incorporating recommendations pertaining to the subject application.

Step 7 LaSalle Council Meeting and Decision of Council: The Council of the Town of LaSalle is the decision making authority with regard to Site Plan Control Applications.

If Council grants approval in principle to the subject application the Town Solicitor is authorized to prepare the corresponding Site Plan agreement.

Where an application is referred back to Town Staff, the owner/applicant/agent should contact Planning Staff to discuss the options and opportunities going forward, and for clarification of the referral.

Where an agreement is required to be prepared, Town Staff work with the Town Solicitor to prepare an agreement for review and adoption by Council. Where an agreement is required, the Applicant will need to prepare and submit engineering plans and other documents (such as legal plans of survey). Once an agreement has been prepared, a By-law to authorize the execution of the agreement is presented to Council for Adoption. It should be noted that the owner/applicant is required to pay all costs associated with the preparation of this agreement, including all legal costs and the costs associated with the preparation of all required engineering plans and legal plans of survey. These costs are not included in the application fee.

STEPS IN THE PROCESS

Step 8 Appeal Period and Enactment: Following the decision of Council, and subject to the provisions as set out in the Planning Act, an appeal by the Applicant may be made to the Ontario Municipal Board (OMB) by filing a notice of appeal with the Clerk of the municipality. If no objections ("appeals") are submitted, the By-law is enacted and brought into full force and effect.

It should be noted that the owner/applicant is responsible to pay all of the costs associated with the registration of the Site Plan Control Application by the Town Solicitor.

YES NO

If "Yes", please provide a copy of this report and any communication that has been submitted to and/or received from the Ministry of Natural Resources and Forestry

6. Significant Features Checklist

Check through the following list. Indicate under YES, NO, or UNKNOWN if a listed feature is on-site or within 500 metres. Indicate under YES, NO, or UNKNOWN if a listed development circumstance applies. Be advised of the potential information requirements in noted sections.

FEATURES OR DEVELOPMENT CIRCUMSTANCES	YES	NO	UNKNOWN	IF FEATURE; SPECIFY DISTANCE IN METRES	POTENTIAL INFORMATION NEEDS
Non-farm development near designated urban areas or rural settlement areas					Demonstrate sufficient need within 20 year projections and that proposed development will not hinder efficient expansion of urban areas or rural settlement areas.
Class 1 Industry ¹				___ metres	Assess development for residential and other sensitive uses within 70 metres.
Class 2 Industry ²				___ metres	Assess development for residential and other sensitive uses within 300 metres.
Class 3 Industry ³ within 1000 metres				___ metres	Assess development for residential and other sensitive uses within 1000 metres.
Land Fill Site				___ metres	Address possible leachate, odour, vermin and other impacts.
Sewage Treatment Plant				___ metres	Assess the need for a feasibility study for residential and other sensitive land uses.
Waste Stabilization Pond				___ metres	Assess the need for a feasibility study for residential and other sensitive land uses.
Active railway line				___ metres	Evaluate impacts within 300 metres.
Controlled access highways or freeways, including designated future ones				___ metres	Evaluate impacts within 100 metres.
Airports where noise exposure forecast (NEF) or noise exposure projection (NEP) is 28 or greater					Demonstrate feasibility of development above 28 NEF for sensitive land uses. Above the 35 NEF/NEP contour, development of sensitive land uses is not permitted.
Electric transformer station				___ metres	Determine possible impacts within 200 metres.
High voltage electric transmission line				___ metres	Consult the appropriate electric power service.
Transportation and infrastructure corridors				___ metres	Will the corridor be protected? Noise Study prepared?
Mineral aggregate resource areas					Will development hinder access to the resource or the establishment of new resource operations?
Mineral aggregate operations				___ metres	Will development hinder continuation of extraction? Noise and Dust Study completed?
Mineral and petroleum resource areas					Will development hinder access to the resource or the establishment of new resource operations?
Existing pits and quarries				___ metres	Will development hinder continued operation or expansion? Noise and Dust Study completed?
Significant wetlands or potentially significant wetlands				___ metres	Provide Environmental Impact Study.
Significant ravine, valley, river and stream corridors and significant portions of habitat of endangered and threatened species				___ metres	Provide Environmental Impact Study.
Significant fish habitat, wildlife habitat, woodlands, valley lands, areas of natural and scientific interest.					Provide Environmental Impact Study.
Sensitive groundwater recharges areas, headwaters and aquifers.					Demonstrate that groundwater recharge areas, headwaters and aquifers will be protected.
Significant landscapes, vistas and ridge-lines, significant built heritage resources and cultural heritage landscapes.					Development should conserve significant landscapes, vistas and ridge-lines, significant built heritage resources and cultural heritage landscapes.
Significant archaeological resources					Assess development proposed in areas of medium and high potential for significant archaeological resources. These sources are to be studied and preserved, or where appropriate, removed. Catalogued and analyzed prior to development.
Erosion hazards					Determine feasibility within the 1:100 year erosion limits of ravines, river valleys and streams.
Floodplains					Determine limit of Development or where a Special Policy Area (SPA) is in effect, development must meet the Official Plan policies.
Hazardous sites ⁴				___ metres	Slope Study, Flood line Study
Contaminated sites					Assess an inventory of previous uses in areas of possible soil contamination.
Prime agricultural land					Demonstrate need for use other than agricultural and indicate how impacts are to be mitigated.
Agricultural operations				___ metres	Development to comply with the Minimum Distance Separation Formulae and O. P. policies.

¹Class 1 Industry - small scale, self-contained plant, no outside storage, low probability of fugitive emissions and daytime operations only.

²Class 2 Industry - medium scale processing and manufacturing with outdoor storage, periodic output of emissions, shift operations and daytime truck traffic.

³Class 3 Industry - indicate if within 1000 metres - processing and manufacturing with frequent and intense off-site impacts and a high probability of fugitive emissions.

⁴Hazardous sites - property or lands that could be unsafe for development or alteration due to naturally occurring hazards.
