TOWN OF LASALLE
HERITAGE ESTATES AND OLIVER FARMS FLOODING AND PRELIMINARY DESIGN STUDY
OPEN HOUSE
Holy Cross Elementary School (2555 Sandwich W Pkwy)
March 30, 2016 – 4:00 p.m. to 8:00 p.m.

COMMENT FORM

You are invited to give comment or express your concerns related to the Heritage Estates and Oliver farms flooding and preliminary design study. The Town of LaSalle, through their consultant Stantec Consulting Ltd., has initiated a study to investigate the cause and solutions to basement flooding resulting from rainfall events that occurred in August of 2014 and July of 2015. The study will also include a preliminary design of the Oliver Farms area, including road reconstruction, new sidewalks, watermain replacement, storm sewer replacement and evaluation of existing street lighting to meet current Town Standards. The study is being undertaken as a Schedule A+ project under the Municipal Class Environmental Assessment.

Please complete and leave this form today (or later by email, mail or fax) so that your opinions and concerns on this project can be considered. All comments are to be directed to:

Mr. Peter Marra, P. Eng.
