

Notice to Residents

The Town of LaSalle has contracted Mill-Am Paving to undertake road repair work on Martin Lane. The work includes; full depth milling & placing new base & surface asphalt in the eastbound lane between Matchette Road and Malden Road.

The milling and paving operation will take approximately 2 days to complete, milling & placement of base asphalt one day & paving surface asphalt the next day. We intend to start Tuesday May 23rd, and finish on Wednesday the 24th.

Please keep in mind that construction zones are hazardous areas. Use caution while driving and/or walking on the road during this period. The road will be open to through traffic during paving operations, there will be traffic control persons present, please watch for their direction. You will have access to your driveway during this work except during the brief period of time that work is taking place directly in front of your driveway.

Immediately prior to paving, a liquid tar product will be applied to the milled surface. Avoid all contact with this product as it is very hard to remove from vehicles and driveway surfaces. Traffic controllers will not direct you to drive onto these areas, so please follow their direction.

If you have any questions or concerns about special requirements of access to your property, please contact me.

Thank-you in advance for your patience,
