

NOTICE OF PESTICIDE USE

Between June 1, 2015 and October 31, 2015 a mosquito larviciding program will be conducted to reduce mosquito populations. This is being done under the authority of the Medical Officer of Health under Ontario Regulation 199/03 and by permit approval of the Ministry of the Environment in the following communities: Windsor, Essex, Tecumseh, Lakeshore, Leamington, LaSalle, Amherstburg, and Kingsville.

Larviciding will take place to reduce populations of mosquito larvae and to reduce the risk of the West Nile Virus to persons in Windsor-Essex County.

The larvicide Vectobac 1200L biological larvicide PCP #21062 will be applied to standing water that cannot be drained. Vectolex CG biological larvicide PCP #28008 will be applied to sewage lagoons and Altosid Pellets Methoprene (4.25%) PCP #21809 will be applied to catch basins. Only areas within 2 kilometres of urban communities will be treated.

All larvicide will be applied by Ministry of the Environment licensed applicators or trained technicians.

For more information, please call the Windsor-Essex County Health Unit at: 519-258-2146 or 1-800-265-5822. You can also visit the website at: **www.wechu.org**.
