Malden Road EA Addendum Notice of Study Completion

The Town of LaSalle has completed the Malden Road Transportation, Public Safety and Urban Design Improvements Municipal Class Environmental Assessment (EA) Addendum. The study reviewed the recommendations from 2009 to determine if the design was still relevant based on current environmental conditions, changes in traffic patterns and land use/development, and updated municipal and provincial policies.

The project is now in the formal final 30 day review period as part of the Notice of Study Completion (issued on October 14, 2021) stage. An Environmental Study Report (ESR) Addendum summarizing the study process and recommendations is available for public review for 30 calendar days from October 18, 2021 to November 15, 2021. Written comments from the public are welcome until November 15, 2021.

The ultimate recommended design addresses safety, transportation, active transportation, and urban design improvements along Malden Road. The following improvements are included in the EA:

- Widen Malden Road to three lanes from south of Normandy Street to south of Meagan Drive.
- Signalize the Reaume Road intersection and protect for a future road extension to the east of Malden Road.
- Re-align and signalize Bouffard Road to eliminate the offset intersections and create a continuous east-west corridor across Malden Road.
- Adjust alignment at Laurier Drive/Laurier Parkway to improve operations and safety.
- Implement buffered on-road bike lanes and sidewalks on both sides of Malden Road.
- Implement pedestrian crosswalk and multi-use trails near the Cahill Drain to improve east-west connection.
